

Smart One Cloud ERP for The Manufacturing™

Package Powered by RISE with SAP S/4HANA Cloud, private edition

SAP® Qualified
Partner-Packaged Solution

*New Ways of Running Your Business
By SAP S/4HANA Cloud, private edition
for the Manufacturing*

ISS Consulting (Thailand) provides Smart One Cloud ERP for The Manufacturing™, an SAP-qualified partner-packaged solution powered by “RISE with SAP S/4HANA Cloud”. Smart One Cloud ERP for The Manufacturing Package offering helps make the intelligent enterprise a reality and simplifies the move to the cloud and helps in removing the business complexity effectively, the package also includes all-in user-based pricing and hyperscaler infrastructure allow quick scaling while eliminating sticky Capital Expenditures (CAPEX) and in-house deployment costs. With Cloud-based deployment allows for much faster implementation and realization of business benefits, typically start from 20 weeks, depending on the complexity.

**SAP Partner of The Year
2017 - 2020**

Business Challenges Smart One Cloud ERP for The Manufacturing™ Can Solve for Your Company

Disparate, stand-alone software systems.

➤ Streamline processes across all departments and entities involved in successful order-fulfillment.

Lacking supply chain management and production process.

➤ In commerce, supply chain management, the management of the flow of goods and services, between businesses and locations, inbound and outbound supply chain and improving demand planning and production execution.

Global expansion complicated by software integration issues.

➤ Consolidate operational, sales, and financial information across multiple departments, sites, and international locations – to provide real-time visibility into business performance spanning your entire organization.

Outdated, manual and paper processes.

➤ Integrate local offices and subsidiaries with headquarters systems across multiple entities and borders to enable shared services, planning, and budgeting.

Key Benefits

- **Faster deployment** with well-established conversion methodologies
- **Scalable performance**, operational reliability, infrastructure security, and lower total cost of ownership delivered with the hyperscaler of your choice
- **Access** to SAP Business Technology Platform to simplify integration and extensibility
- **Use of the full scope** of SAP S/4HANA Cloud with support for Manufacturing Industry
- **Rapid savings** by ending maintenance payments on traditional perpetual licenses
